# CANNABIS INVESTMENT SUMMIT WORLD

## CISW

CISW is currently one of the biggest event about Cannabis and Hemp in Asia targeting up to 5,000 attendees from around the world. It's a 3-day virtual summit for everyone who is interested in all aspects of the medical cannabis and hemp industry (Research and Development, Investment opportunities, Science and Therapeutics ...).

Cannabis Investment Summit World is the first biggest virtual summit in Asia that brings together cannabis professionals and stakeholders across industries to share valuable knowledge and experience. On the eve of cannabis legalization laws, the summit plans to be a timely and informative conference.

During the 11-13 of November 2020, our dedicated team aims to attract leaders and investors from both public and private sectors around the world. The CISW is a three-day event, organized and managed by JBN Global Group and CS Recovery Group (CSG).

The intent of the summit is to bring together professionals from a wide range of industries connected to medical cannabis. The goal is to foster learning, collaboration and innovation. The virtual conference will provide new perspectives on this emerging industry, and how it will impact ASEAN (drive innovation, create economic advantages...)

As a sponsor, this will be your golden opportunity to "BE THE LEADER" in Asia's cannabis industry and draw attention from both national and international clients on your products and services, including research leaders, educational institutions, investors and all international cannabis committees.

For more exclusive contents of Jack Ong please follow the below link

## DAY 1

---

CANNABIS INVESTMENT SUMMIT WORLD

[WWW.CISWSUMMIT.COM](http://WWW.CISWSUMMIT.COM)

2021

# AGENDA

DAY 1

11th NOVEMBER 2021

**Dr. Jintana Manorompatrasal**

"Sharing Clinical expertise in Thailand's medical cannabis treatment (10,000 cases)"

**Assoc.Prof.Dr. ThavatchaiKamoltham**

"Information on vision and strategy as a young national guru about cannabis"

**Dr. Mark Braunstein**

"Cannabinoid Assisted Psychotherapy for Mental Health Disorders"

**Dr. Uma Dhanabalan**

"The past, the present, and the future"

# AGENDA

DAY 1

11th NOVEMBER 2021

---

## Dr. Andrew Agius

"The use of minor cannabinoids in the management of chronic pain"

---

## Dr. Vasko Dinev

"Evidence-based medicine, GCP, GMP, etc."

---

## Dr. Sandra Carrillo

"Medical Cannabis Scientific Evidence, Clinicians Perspective"

---

## Prof. Dr. Anuvat Roongpisuthipong

"Cannabis as a potential treatment for COVID-19"

2021

# AGENDA

## DAY 2

12th NOVEMBER 2021

### Glen Kayll

"Hemp Plastics - the next biggest thing in cannabis hemp industry"

### Jimmy Sadegi

"BACK TO THE FUTURE with Cannabis Genetics"

### Srinivasa Reddy

"The Therapeutic Potential of Cannabinoids on Health System"

### Tracy Ryan

"Saving Sophie: One Mom's Journey to Find a Cure Using Cannabis and Cell Therapy"

# AGENDA

## DAY 2

12th NOVEMBER 2021

### Morris Johnson

"Broad Industry-wide paradigm shift progress during 2021 and benchmarks, milestones and goals for 2022"

### Ramon Granados

"Project Management Process for Large Scale Hemp Projects"

### Johan Mohamad

*"Paving the way for Industrial Cannabis - An Exemplary paradigm on iHemp & UNSDGs 2030 "*

### Wilson Chai

"HEMP City -Paradise in the Making"

# AGENDA

## DAY 2

12th NOVEMBER 2021

### Yosi Sherman

“Medicinal Cannabis Security  
and Regulation”

### Nick Tulloch

“The Outlook for the CBD Market”

### Sergiy Kovalenkov

“Innovative use of hemp in  
sustainable construction  
industry”

### Adam Shuster

“Agro systems of growth  
A.outdoor B.Greenhouse.  
C.Indoor”

# AGENDA

**DR. JINTANA MANOROMPATRASAL**

MD, PSYCHIATRIST, MEDICAL CANNABIS  
SPECIALIST

# TOPIC

“SHARING CLINICAL EXPERTISE IN THAILAND'S MEDICAL CANNABIS TREATMENT (10,000 CASES)”

---

For over 30 years, Dr. Jintana focuses her specialization in rehabilitation medicine and cancer care. She found the wonder of Cannabis as she searched for solutions to aid her cancer patient's pain. It marked as the most rewarding time in her professional years and has been treating her patients at Sawasdee Clinic ever since.

Today she will tell the story of over 10,000 patients from final-stage Cancer, Parkinson's disease, Alzheimer's, Depression, Autism, Multiple Sclerosis, Chronic Pain, and many more. With a combination of conventional cannabis and hundreds of Thai herbal pharmacopeias, the treatment potential goes far beyond anywhere in the world.

11TH NOVEMBER 2021

ASSOC.PROF.DR. THAVATCHAI KAMOLTHAM

DEAN OF COLLEGE OF ALLIED HEALTH  
SCIENCES,  
SUAN SUNANDHA RAJABHAT UNIVERSITY

## TOPIC

“INFORMATION ON VISION  
AND STRATEGY AS A YOUNG  
NATIONAL GURU ABOUT  
CANNABIS”

Sharing information on vision and strategy as a young national guru about cannabis. Our mission is to build people with real knowledge of cannabis.

We do research, build a laboratory, factory, and medical clinic about cannabis in the same place. And how to collaborate in the cannabis business.

**DR. MARK BRAUNSTEIN**

MEDICAL DOCTOR AT RECONCIOUS MEDICAL

# TOPIC

PSYCHIATRIST, CEO & FOUNDER, RECONSCIOUS MEDICAL

Cannabis has continued to evolve alongside humans for centuries, therefore cannabis today is very different from that of the '60s. It is more potent, as well as more therapeutic. Advances in cultivation technology and an increasing amount of data on cannabis effects, have set the stage for a new frontier of customized plant medicine.

One such frontier is Cannabinoid Assisted Psychotherapy.

Unfortunately, nearly 90% of residents and fellows report that they do not feel prepared to prescribe medical cannabis to patients. Providing guidance to these medical providers, so they feel more comfortable diagnosing mental health disorders, understanding the endocannabinoid system in relation to mental health disorders, and implementing Cannabinoid Assisted Therapy as a treatment for mental health disorders can help change the world.

You have the Power to Change the World.

**Reconscious

DR. UMA DHANABALAN

MD MPH FAAFP MRO CMS - U.S.A.

TOPIC

“THE PAST, THE PRESENT,  
AND THE FUTURE”

Dr. Uma Dhanabalan is a highly respected and educated physician and known to most as Dr. Uma. She completed her Bachelor of Arts degree with high honors from Rutgers University and Medical Degree from the University of Medicine & Dentistry in Newark, New Jersey. She completed her Family Practice Residency at the Medical University of South Carolina, in Charleston, South Carolina. She has her Master's in Public Health and completed her Occupational & Environmental Medicine Residency and Fellowship in heavy metals at the Harvard School of Public Health in Boston Massachusetts. She is a Fellow, of the American Academy of Family Physicians. She is also Certified by the American Academy of Cannabinoid Medicine as a Cannabinoid Medicine Specialist and by the Medical Review Officer Certification Council as a Medical Review Officer.

Her mission is to change the Stigma regarding Cannabis and for the world to know about the Endocannabinoid system through education. Dr Uma Says®, “Cannabis is not for everyone, yet it should be a first line option not the last resort” and “Cannabis is not an entrance drug, it is an exit drug from pharmaceuticals, narcotics, alcohol and nicotine.” “Cannabis The Exit Drug®”

# TOPIC

“THE USE OF MINOR CANNABINOIDS IN THE MANAGEMENT OF CHRONIC PAIN”

---

Chronic pain is a worsening global pandemic affecting at least 20% of the adult population. Pharmaceutical options are limited and may cause unwanted side effects. Medical cannabis with THC can reduce pain levels by at least 50% but may cause side effects in high doses.

CBD, CBG, and CBN are minor cannabinoids that can enhance the pain-relieving effect of THC while reducing side effects. By combining THC with other cannabinoids, we can achieve optimal pain relief with little or no side effects. Stay tuned to find out how the best medicines for pain are formulated.

11TH NOVEMBER 2021

## DR. VASKO DINEV

CO-FOUNDER OF IMPERIAL GREEN LTD., NORTH MACEDONIA

## TOPIC

“EVIDENCE BASED MEDICINE,  
GCP, GMP, ETC...”

Dr. Vasko Dinev has obtained his diploma in Human Medicine in 2006 and started his career in clinical research, in organizing and conducting clinical trials. In more than 10 years of working in clinical research, as senior officer on different global cross-functional positions, he was involved in substantial number of clinical trials (pediatrics, vaccines, Phase I-IV) with various medical indications. Dr. Dinev is also a co-author of GCP Patient Brochure, approved and endorsed by various regional regulators, intended to increase the awareness of the patients for the possibilities and opportunities in participation in clinical trials.

In 2017, he co-founded “Imperial Green Ltd.”, a consultancy company with focus on medical cannabis. Imperial Green as company is specialized into local regulations, project management, business development and implementation of industry standards. Also, through his company, Dr. Dinev is partner in one of the biggest medical cannabis cultivation facilities in Republic of North Macedonia, where he is involved as Advisor of the Executive Board.

## TOPIC

### “CANNABIS AS A POTENTIAL TREATMENT FOR COVID-19”

As we all know that Covid-19 is a serious contagious and widespread viral infection all over the world, resulting in millions of dead cases from a severe pulmonary infection. The scientists are also looking for preventive and treatment measures for covid 19 infection.

Cannabis could be used as a potential treatment of this infection. The main target is to reduce inflammation in the patient's lungs which will result in lung fibrosis and make it difficult to breathe and die. The process of inflammation called cytokine storm concerning 2 cytokines. IL6+TNF $\alpha$  as an important target for treatment.

THC and CBD are useful in the treatment of covid 19. Some scientists found that specific terpene in Cannabis can also help to treat covid 19. Some scientists in many research institutes are working hard to prepare and report the study of cannabis as a treatment of covid 19 which will come out as a peer-reviewed scientific paper soon.

**GLEN KAYLL**

CEO OF THE HEMP PLASTIC COMPANY

# TOPIC

“HEMP PLASTICS - THE NEXT BIGGEST THING IN CANNABIS HEMP INDUSTRY”

Hemp deregulation and industrial hemp expansion have come at an important time in world history. We, as caretakers of this planet, are being forced to tackle the massive dual challenges of global plastics pollution and carbon emissions. Hemp plastics represent a meaningful, innovative, cost-effective, and near-term approach to these challenges.

Plastic converters and consumers are taking note and taking action. Hemp plastic is contributing to the sustainability initiatives of dozens of leading Tier 1 and medium-sized organizations alike, as consumers, governments, and investors demand action. Mr. Kayll’s presentation will discuss the growth of industrial hemp, its implications beyond CBD and nutraceuticals, and the hemp plastic solutions that are available today.

12TH NOVEMBER 2021

# JIMMY SADEGI

CO-FOUNDER & CHIEF GENETICS OFFICER  
THE ORIGINAL BREEDERS LEAGUE

## TOPIC

### “BACK TO THE FUTURE WITH CANNABIS GENETICS”

Breeding is the last frontier the industry will explore. Although breeding and genetics are the last frontier, this segment of the cannabis industry will prove to be the most significant to the advancement and sustainability of the cannabis sector as a new multi-billion dollar global industry.

Understanding the history of Breeding cannabis genetics, what the current problems are in the world of breeding and cannabis genetics and finally highlighting the current & future opportunities working in breeding and cannabis genetics will give audience members a clearer understanding of how tantamount genetics are to the success of the industry, the profound impact cannabis genetics have on businesses and finally how significant breeding is for cannabis's effectiveness on patients and customers.

It all starts with a seed.

**SRINIVASA REDDY**

FOUNDER AND COO OF CUBE PSYTECH CORP.

# TOPIC

## “THE THERAPEUTIC POTENTIAL OF CANNABINOIDS ON HEALTH SYSTEM”

---

The recent trend for legalization of medicinal cannabis and cannabinoid-containing products, together with their soporific effects, has led to a surge of interest of their potential therapeutic role in the management of some common sleep disorders, such as insomnia, sleep disordered breathing, and restless legs syndrome, and less common disorders such as narcolepsy and parasomnias, chronic pain management, epilepsy etc.,

Although much of the pre-clinical and clinical data were derived from studies with relatively small sample sizes and limited by biases in assessment, and in clinical trials lack of allocation concealment, as a whole, there is a potential therapeutic role for cannabinoids in the management of several health issues. Clinical trials are underway for several health disorders, but there remains a substantial need for rigorous large multi-center studies to assess the dose, efficacy, and safety of the various types of cannabinoids on specific targeted issues.

# TOPIC

“BROAD INDUSTRY-WIDE PARADIGM SHIFT PROGRESS DURING 2021 AND BENCHMARKS, MILESTONES AND GOALS FOR 2022”

---

Paradoxically 2021 North American hemp indoor and outdoor acreage plummeted just as emerging research suggests CBD and the cannabis bioactive entourage may be a key part of the complementary toolbox to treat and prevent Covid and also constitute an anti-aging mainstream food supplement.

Economic models of DIY, craft, corporate, and agri-food are converging into an integrated distributed global model.

Regulatory goals include an MDR and RDA for CBD and other cannabis bioactive. Billions in investment capital pouring into the emerging anti-aging meta industry constitute the pull the cannabis and hemp industry needs to create long-term sustainable growth as 7.8 billion customers have unmet needs we can fill.

12TH NOVEMBER 2021

## RAMON GRANADOS

FOUNDER & CEO HEMP ENGINEERING PTY LTD

## TOPIC

“PROJECT MANAGEMENT  
PROCESS FOR LARGE SCALE  
HEMP PROJECTS”

Since the dawn of Green Rush, \$ Billions have been pumped into the Cannabis Industry to build up the infrastructure to operate a Supply Chain Operation that in many cases, the project has been unsuccessfully delivered for lack of EPCM good practices of Planning & Project Controls.

With the expansion of the Industry into Biomass Engineered products, this specialized Project Management service became very useful and supportive in the O&G Industry expansion in the last 35 years to monitor Project deliveries and operations in multiple countries and continents.

**JOHAN MOHAMAD**

FOUNDER AND PRESIDENT OF MHIRA

# TOPIC

## PAVING THE WAY FOR INDUSTRIAL CANNABIS - AN EXEMPLARY PARADIGM ON IHEMP & UNSDGS 2030"

Sustainability and hemp policies can be perfect tools and resources for our government to achieve the UN Sustainable Development Goal Global Indicator and we have identified that hemp policies can provide great potential for the government to achieve 64 out of 231 Goal Global Indicators. This is an important policy toolkit adopted by global consensus in 2016. We will be focusing on 4 out of 7 thematic chapters outlined in UNGASS 2016 which is human rights, new trends, international cooperation, and development.

MHIRA (Malaysia HempTech Industrial Research Association) would like to provide relevant information to show the potential of the hemp plant, with an appropriately regulated setting, has a great potential to create a transformative impact for our society and our nation, so long as ethical practice and sustainable approaches are kept central by providing an in-depth understanding of how industrial hemp can be linked with sustainable development goals.

EXECUTIVE CHANCELLOR AT OAKSTERDAM  
UNIVERSITY

## TOPIC

“INTERNATIONAL TRADE,  
LAWS AND REGULATIONS,  
AND THE GLOBAL  
INVESTMENT MARKET”

---

To participate and compete in the global cannabis marketplace, thoughtful regulation is key. The laws in each country determine the viability of successful production, manufacturing for export, and attracting investments for the required infrastructure. Regulations must ensure that product adheres to European good agricultural and manufacturing practices (GAP), the strictest in the world and where the wealthy consumer import markets currently exist.

Importantly, permit types and access to licenses, along with quality education, can determine the course for local job creation and equity. Focus on health, safety, and wealth-building for the nation, citizens, and environmental management in law.

13TH NOVEMBER 2021

# MARCUS RAMKISSOON

CANNABIS POLICY SPECIALIST & DIRECTOR OF  
CARIBBEAN CANNABIS INSTITUTE

## TOPIC

“INTERNATIONAL CANNABIS –  
A REGULATORY AND  
BUSINESS UPDATE”

Licensed Cannabis business operations are now regulated in many parts of the world. Cannabis regulations are not yet uniform and many variances exist within the existing frameworks. This presentation will briefly examine the newest regulatory updates within the industry and highlight particular regulatory clauses and their implications.

Like most manufacturing and processing industries, Cannabis businesses can operate on a national, regional, and international level. Mr. Ramkissoon will focus on realistic business models, products, and available markets within the international Cannabis industry and will seek to update investors and entrepreneurs regarding the international market changes and business feasibility in various regions and countries.

## STEPHEN OLIVER

CO-FOUNDER OF THE CANNA CONSULTANTS

---

# TOPIC

“A REGULATORY OVERVIEW OF THE EU AND UK FOR BOTH THE CBD MARKET AND MEDICINAL CANNABIS”

---

Confusion reigns in the UK and across Europe from the lack of policy, communication, and harmony in the approach to Novel foods. Which factors are preventing the industry from moving forwards with certainty, how can businesses protect themselves whilst planning for the future and what will that future look like?

It is now the three-year anniversary of the change in UK law which promised greater access to Cannabis-Based Products for Medicinal Purposes (CBPM's). With only four patients receiving medication on the National Health Service; what has happened, what will happen, and what has to happen to resolve this?

13TH NOVEMBER 2021

DR. THOMAS E. FERNANDEZ

RESEARCHER, UNIVERSITY OF THE THAI  
CHAMBER OF COMMERCE

## TOPIC

“CUSTOMS REGULATIONS FOR  
CANNABIS AND CANNABIS  
PRODUCTS”

Medical Cannabis is being legalized in more and more countries. Apart from domestic consumption, the export and import of cannabis products are increasing. However, since this is still a fairly new commodity in (legal) international trade, each country is updating their laws and regulations. Even within the EU, the regulations differ from country to country, and in the US, they even differ from state to state.

This presentation is taking a snapshot of the current situation about import and export requirements in several countries in the world. This update on the situation also takes a look at the future.

“TOKENIZE EVERYTHING –  
HOW TO BUILD  
SECONDARY MARKETS IN  
THE CANNABIS INDUSTRY”

---

Crypto has enabled the easy and decentralized creation of primary and secondary markets. But these markets are not limited to crypto-assets—quite the contrary. Everyone can now design their economics and release their own assets. Imagine, for example, releasing a token for your next harvest.

13TH NOVEMBER 2021

ALBERT TIÓ

PRESIDENT, FEDERATION OF SELF-REGULATED  
CANNABIS ASSOCIATIONS OF CATALONIA

## TOPIC

“A NEW STRATEGY FOR  
CANNABIS LAW REFORM IN  
SPAIN, EUROPE AND THE  
WORLD: GREEN LIGHT”

The world is living a fast transformation in all aspects and pushes humanity to new challenges that need to be answered with brave and breaking actions and decisions.

Sometimes what we think is a problem, turns to be more the solution and that's our case. We are living in a world tendency towards a change of strategy regarding drugs use and its policies. But each country or continent is facing it with different views and values, which will make big differences with the timings each country reaches an effective way to regulate within laws the consumption, the distribution, and cultivation of the world's most-consumed illegal drug, cannabis.

**FEDCAC**

Federació d'associacions  
cannábiques autoregulades de Catalunya

# TOPIC

## “CANNABIS, AS THE TOOL TO ACHIEVE SDG BEFORE 2030”

Cannabis sativa. L is a plant with a high profile to help humanity to achieve the 2030 SDG. If we keep the glasses from the 20th century, it might be difficult to find rationalities in the relationship between climate change and biodiversity loss with Cannabis sativa L. plant species, as well as Cannabis-related issues to urban building, social standards, health care systems, access to food, water or drugs for any human being on earth.

But with the historical vote by CND last December 2nd, 2020 which changed the scope of control over Cannabis as a medicine, withdrawn from schedule IV which is for substances « with no therapeutic values », this will facilitate research and rehabilitate Cannabis use as a medicine. At the same time, hempcrete, all CBD products from hemp, and other related products are gaining more interest from consumers and many other stakeholders.

In line with the international conventions, it has to be clear: Out of the medicinal purposes derived from Cannabis plants, all uses are fully legal because it is merely and only industrial purposes which are exempted from International controls.
