

INVESTMENT HIGHLIGHTS

1. Investor invests USD4 million and get the investment back in 1 year. Second and third years are all profit at least 200+%.
2. After 3 years, investor still can continue to buy from the factory at market price making normal trading profit.
3. This nitrile glove factory is owned by a reputable doctor with many businesses in hospital, healthcare and so on.
4. The factory is producing the best quality nitrile glove acceptable internationally.
5. If investor has nitrile glove buyer on hand, you know what profit you can make out of this investment.
6. My market information as follows:
 - There are many buyers from the whole world but cannot find supply. Many Thai traders cannot deliver because they have no stocks.
 - 65% of the world nitrile glove produced in factories in Malaysia.
 - No factories in Malaysia are accepting L/C.
 - Factories normally are asking 30%-60% deposit and balance before shipment.
 - No factories in Thailand and Malaysia need to have new buyers except buyers are paying exceptional high price.
 - Wholesale price of nitrile glove in Europe should be around USD15/box.
7. Highlights of this investment:

- Very attractive return for your USD4 million investment - Get back investment in 1 years and 2 years profit and then 3 years normal trading profit. What other investment can have this kind of return.
- The nitrile glove shortage will last for another 2-3 years' time due to COVID-19 still around.
- Hospital and clinics are still buying for their daily use for another 5-10 years.
- Since investor has a guarantee quota, you can sell your nitrile glove stock by bidding every 3 months. The highest bidder gets the order.

DIRECT INVESTMENT IN A NEW NITRILE GLOVE FACTORY IN THAILAND

We, CISW International Co., Ltd., has been appointed as representative of a new Nitrile Glove factory seeking a new investor to invest as a JV partner.

INVESTMENT OPPORTUNITY

The factory is offering a significant shareholding to a new JV partner in its first phase development.

OVERVIEW

It is a brand-new Nitrile Glove manufacturing company in Thailand.

The new first phase factory is located in Chonburi Province.

Factory has acquired land, built factory and ready to install production lines in its first phase development.

Factory has ordered 8 production lines in its first phase development.

Start production with 4 lines in about 2 months and another 1-month full capacity of 8 lines production

Factory has obtained all licenses to build this factory.

Factory has applied all international license for export to USA and Europe.

OFFER

The factory is offering a significant shareholding up to approx. 40% to a new JV partner.

The investor has to pay a 50% premium buying the increased new shares to be issued by the factory.

KEY HIGHLIGHTS

A reputable doctor with plenty of investment in hospitals, healthcare and retirement projects leading his group of investors started this promising project.

This factory will start production in about 2 months. Everything is ready to go.

All hospitals and clinics in the world are buying and using more Nitrile Gloves at present and in future due to the unstoppable COVID-19.

There is a shortage of Nitrile Glove supply in the world. Malaysia, Thailand, Indonesia are the main production bases.

I learnt there are news that US has banned Malaysia Top Glove products exported to USA due to Top Glove is unable to meet certain conditions.

It is 100% a hot investment in the world especially in Thailand.

THE BEAUTY OF THIS INVESTMENT WILL BE THE TARGETED IPO. If going direct IPO, it may take 2 years from now but there is always SHORT CUT to the same destination.
